

To whom it may concern

For expanding our business model we decided to find our needed staff resources in the Czech Republic.

Therefore we needed to set up a legal entity (s.r.o. company). We had to hire and select 50 English speaking staff with university level degree. We had to find a training facility with Internet access for all these staff members during several weekends in Prague.

We had to find an administration office to secure payments to our staff according to payment by production schedules.

All this had to be done within a 1-month period.

Conbiz made us an offer to set it all up for us at a very reasonable price and we decided to go ahead with them.

We experienced an incredible service level 24 hours a day, a very professional attitude and handling of all our requests and most important: they did what they promised they would do and really over delivered. All deadlines were met, costs remained within the agreed budget. We still do day-to-day business with Conbiz with a lot of pleasure.

For whatever business you need help with in the Czech Republic, we can recommend Conbiz to be your partner.
